# ABOUT US

## COMPANY HISTORY

NSBC was established when the number of progressive people decided to assemble their skills and knowledge to create a valuable company and to achieve success in 2012. We have an experienced team on production and engineering specialized on metal constructions and fabrications. We specialize in making metal constructions according to the projects forwarded by the Client. By making smart use of different experiences we have developed several high-quality products and services.

We materialize Clients concepts and bring it to their table. Finding solutions and their realization create excitement for us and satisfaction for our Clients.

4 key factors make us better on market;

- Know-How and Experience
- High Quality
- Efficient Work
- Competitive Prices

## WORKSHOP

- 18.000 sqm open and 2600 closed area
- 10 T inside overhead crane and 3.5T portal cranes
- Heated Painting shop with all legal permissions
- Blasting shop with all ventilation system
- Full equipment for metal construction

# SERVICES

## LASER CUTTING

- Triumph Laser cutting with profile cutting availability.
- Max thickness 15mm on mild steel
- Max thickness 6mm on stainless steel
- Max thickness 5mm on Aluminum
- Pipes and profiles cutting 2x Bend-Saws
- Shear (2m)

- Max thickness 30 mm on mild steel
- Max thickness 15 mm on stainless steel

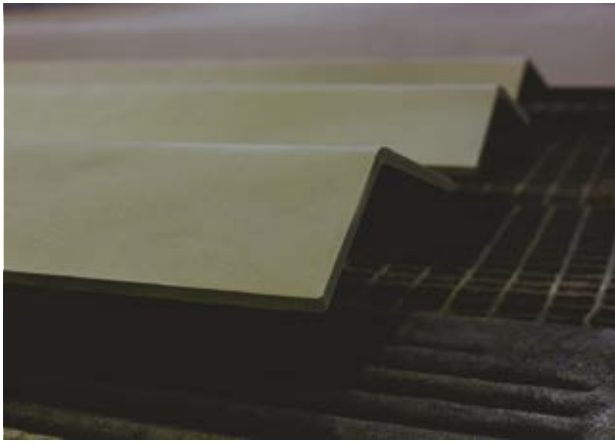

## PLASMA CUTTING

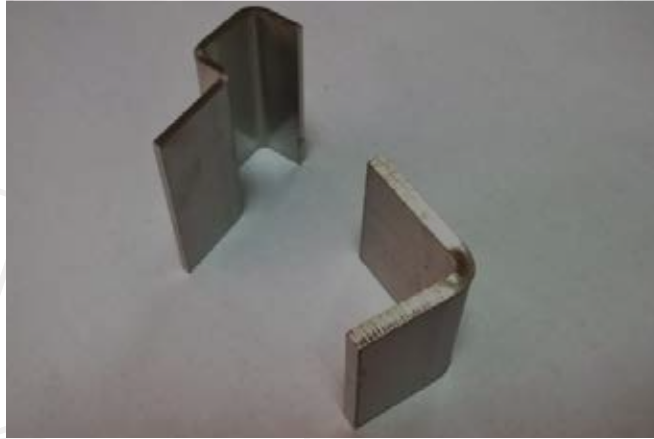

## PUNCHING

- Muratec Motorum 2044-EZ
- 20T capacity
- 1250 x 1250 mm

# BENDING

- Amada Press Brake (4m, 320 T)
- Subcontracted Press Brake (8m, 800 T)

# MILLING

- BM-1200 AWEA
- 1250 x 600 CNC Centre
